sales@picltd.comwww.picltd.com**SPY Calibration & Repair Services**

Part No.	Description	Price
CERTS	Certification Documents ONLY (All Models)	\$56.00
REPAIRS	Hourly Rate (for Repairs & Calibration ALL MODELS)	\$116.00

Average calibration time varies per model
 (Cert. Cost +Hourly Rate=Total Calibration Cost)

Average repair time varies on the complexity of the repair
 (Part Cost +Hourly Rate+ Cert.Cost=Total Repair Cost)

The average turnaround time for repairs is 10 days from
 the date of arrival to our facility. Depending on the
 complexity of the repair that time could vary.

The Engineering Department at Pipeline Inspection Co. recommends once per year recalibration of our holiday detectors and jeep meters, based on industry practice and our statistical analysis methodology and historical calibration data.

Our products do not tend to drift, but calibrating them annually helps to comply with directions from ISO 17025, ANSI/NCSL Z540, MIL-STD-45662A and similar standards and to ensure that items are in-tolerance during use .

Recalibration of our products should be performed only at the factory due to unique calibration process and test equipment utilized.

We encourage our customers to establish a calibration intervals plan, based on our recommendations or in-house engineering reviews to reduce down time and the risk of injury to personnel or damage to equipment.

Our Engineering and Technical Staff are available to help answer any questions you may have regarding this issue or any other technical issues. Please contact us with any questions you may have.

PIPELINE INSPECTION COMPANY**NEW PRICES COMING JULY 1ST 2017**

sales@picltd.comwww.picltd.com**Holiday Detector, Rentals-available only in the USA**

Model	Daily	4 Day Minimum
780, 785, 790, 115, 125, 135	39.00	\$156.00
JM	34.00	\$136.00

- All rental detectors (portable) are furnished with used equipment consisting of: 2-batteries, 1-battery charger, 1-electrode wand, 1- 50 ft. ground cable, 1- shipping/carrying case, 1-operating instructions, 1-certificate of calibration and your choice of 2 sizes of spring electrodes. See separate spring electrode price sheet for available sizes. Any additional electrodes for use with your rental must be purchased separately. **Note: Any damaged to rental equipment beyond normal wear and tear, or if the rental equipment is lost/stolen, customer will be invoiced at the full retail price.**
- All rental equipment will have a (4) day minimum rental period. Rental begins the date equipment is shipped and stops the day the equipment is received at the factory. Shipping method is determined by the renter and is charged separately from rental rate on the first months invoice.
- Many times a customer who has been renting a detector decides to purchase the unit. The length of time out on rent is taken into consideration when determining the final payoff required to purchase the unit. Used Rental equipment can be purchased anytime during the rental cycle by simply contacting our sales staff via email/phone.

Rental period begins the date equipment is shipped and stops the day equipment is received at the factory. There will be no exceptions!

Holiday Detector, Rental Purchase-available only in the USA

PT-750	\$89.00	\$356.00
Underwater Wand (100, 200 or 500 ft)	\$50.00	\$200.00

- All Pig Tracking rental systems include one transmitter (PT-101 for Model 1, PT-107 for Model 2, PT-275 for Model 4, PT-750 for Model 12), 2-PTR receivers, 2-pick-up wands, 2-batteries, 1-operating instructions and 1-shipping/carrying case. Mounting plate for mounting transmitter to steel mandrel pig is included upon request. **Note: Any damaged to rental equipment beyond normal wear and tear, or if the rental equipment is lost/stolen, customer will be invoiced at the full retail price.**
- All Pig Tracking rental equipment will have a four (4) day minimum rental period. Rental begins the date equipment is shipped and stops the day the equipment is received at the factory. Shipping method is determined by the renter and is charged separately from rental rate on the first months invoice.
- Many times a customer who has been renting a detector decides to purchase the unit. The length of time out on rent is taken into consideration when determining the final payoff required to purchasing the unit. Used Rental equipment can be purchased anytime during the rental cycle by simply contacting our sales staff via email/phone.

Rental period begins the date equipment is shipped and stops the day equipment is received at the factory. There will be no exceptions!

Pig Tracking, Rental Purchases-available only in the USA

Model	Payment Term	Price
PTR w/KIT	(\$1,155.00 per month for 5 months)	\$5,775.00
PT-101 (unit only)	(\$616.00 per month for 5 months)	\$3,080.00
PT-107 (unit only)	(\$530.00 per month for 5 months)	\$2,650.00
PT-275 (unit only)	(\$812.00 per month for 5 months)	\$4,060.00
PT-750 (unit only)	(\$1,150.00 per month for 5 months)	\$5,750.00
Model 1	(\$1,575.00 per month for 5 months)	\$7,875.00
Model 2	(\$1,489.00 per month for 5 months)	\$7,445.00
Model 4	(\$1,771.00 per month for 5 months)	\$8,855.00
Model 12	(\$2,109.00 per month for 5 months)	\$10,545.00

- All rental purchase must be specified at time of order or prior to shipment. No exceptions will be made. All rental purchases are furnished with new equipment.
- Pig Tracking System Model KITS include: 1-Transmitter (PT-101 for Model 1, PT-107 for Model 2; PT-275 for Model 4; PT-750 for Model 12), 1- Receiver (PTR), 1- 3 ft. Pig Tracking Receiver Wand, Batteries (quantity and voltage vary per model), 1- Adjustable Strap, 1- Operating Instruction Booklet and 1- Shipping/Carrying Case.
- PTR KIT includes: 1- 3 ft. Pig Receiver Wand, 1- Adjustable Strap, 2- 9V Batteries, 1- Shipping/Carrying Case and 1- Operating Instructions Booklet.
- All Models marked as "unit only" are furnished with batteries and shipped in a cardboard box, unless a shipping/carrying case is ordered.
- All Pig Tracking Equipment has a 3 month warranty on materials & workmanship **EXCEPT** the PTR which has a 12 month warranty.
- All freight charges, additional components and other special charges will be invoiced on the first month invoice.

13993	28"	\$90.00

- These internal electrodes are made using conductive neoprene circles sandwiched between aluminum disks. Two such plates, joined with spacers, to form a "PIG" type electrode for the inspection of internally coated pipes. With metallic spacers, there is a double signal at each holiday. **If double signaling is not desired, please specify when placing order so non-conductive spacers will be used.**
- To use an internal electrode, a high voltage cable must be inserted through the pipe, with one end connected to the holiday detector and the other end connected to the internal electrode. As an alternate method, the electrode may be connected to the end of a lance which is then inserted into the pipe. Using this method, the lance must be made of a metallic conductor or a cable must still be used to connect the holiday detector with the electrode.
- PLEASE NOTE:** The inspection voltages to be used, with this type of electrode, must be at least 600 volts. To use inspection voltages lower than 600 volts, a "WET SPONGE" type of electrode must be used.
